JONO MILNES

a **graphic designer** and **front-end web developer** based in London.

EXPERIENCE

Jono Milnes - Freelance

2013 - Present

For the last year and a half I have been working sporadically on freelance projects. Primarily designing and building websites with CMS. I have also created logos, brochures and business cards for a variety of companies, brands and organisations around the world. Highlights include: Designing a logo for Ghana's first trade union UNIWA; branding a start up furniture company; creating a visual website and portfolio for a video production company.

Relations Group - Graphic/ Web Designer

2013 - Present

As a leading Broadcast and Digital PR company, I am responsible for building and up-keeping over 40 Media Property websites using Drupal. I also lead and instigated a full re-brand of the company, from website to business cards. Occasionally, I work on client-facing projects, creating news infographics that are published on websites such as The Telegraph and The Daily Mail.

E. Park & Sons - Marketing Co-ordinator

2013

I was responsible for marketing E. Park's own brand potatoes, stocked in the Co-op & Asda. Within my role I successfully pitched and saw through a collaboration with 20th Century Fox and the re-release of 'Walking With Dinosaurs' on DVD.

Redbrick - Music Editor

2012 - 2013

Managing a team of over 50 writers, I edited, designed and created a double-page weekly spread and updated the website for the Guardian award winning student newspaper.

ABOUT

A graphic-designer-come-web-developer: at one end of the spectrum you have a focus on vision and identity, and at the other, on functionality and ergonomics. Often, the two clash with neither wanting to sacrifice their principles. For me, it's clear: a working knowledge of both aspects is vital to create something that pushes the boundaries and has personality. For what I want to do - who I want to become - an understanding of both is fundamental. I've always enjoyed things looking good. In the re-branding and designing of my student newspaper, I truly realised my passion for identity, branding and image. Since Then, I have grasped all the tools I need to establish myself, and continue to reach for more. I am the sole graphic/web designer at my agency and having honed my skills - especially in web design and development - I am now keen to step up. With almost 2 years experience and a hunger to progress, I am eager to deliver for - and learn from - a great creative team.
